

INSTRUCTIONS

1) PRINT OFF TEMPLATE DOCUMENT

You will use this document to run through the printer again after you've designed your name in a document.

2) CHECK MEASUREMENTS

Do this so you can check the measurements. I've given measurements but printers and documents will vary slightly.

3) DESIGN YOUR DOCUMENT CONTENT

Choose the name content and design your own document. I've given measurements as guidelines to help. Your document content should align with my template content.

4) PRINT

Print your document content names onto the template that you printed originally. It should only print the names you've chosen since the rest of your document will be blank.

5) FOLD & FILL

Fold printed document. Insert inside pouch. Fill with contents.
